INTRODUCTION

smart lock

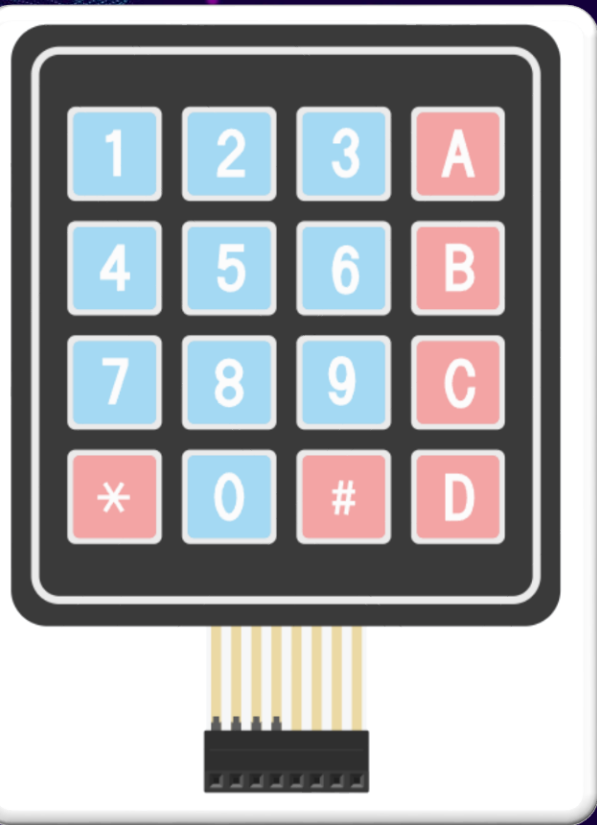

A smart lock is an electronic and mechanical locking device that opens wirelessly with an authorized users' authentication.

NEED OF TOPIC

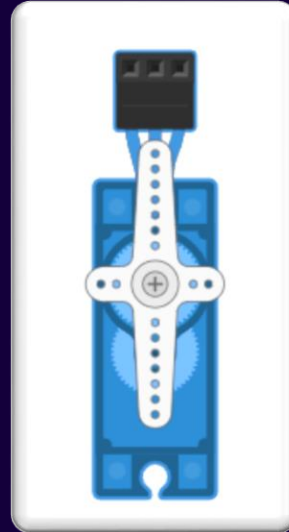

- 1 . To Increase Accessibility Without Compromising Security .
- 2 . Simplify Home Security .
- 3 . To have So Many Options to Lock and Unlock Your Property .

The background is a deep purple gradient. It features several overlapping, wavy, translucent shapes in shades of purple and blue, creating a sense of depth and movement. These shapes resemble liquid or smoke. Scattered throughout the background are numerous small, glowing dots in various shades of purple and blue, giving it a cosmic or digital feel.

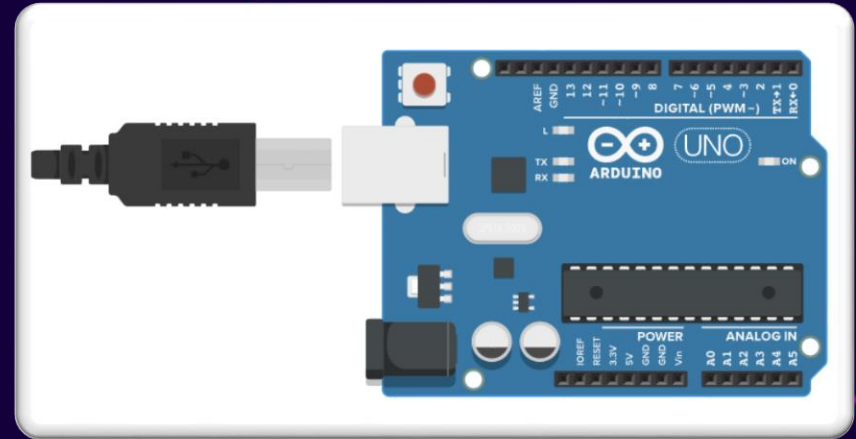

COMPONENTS

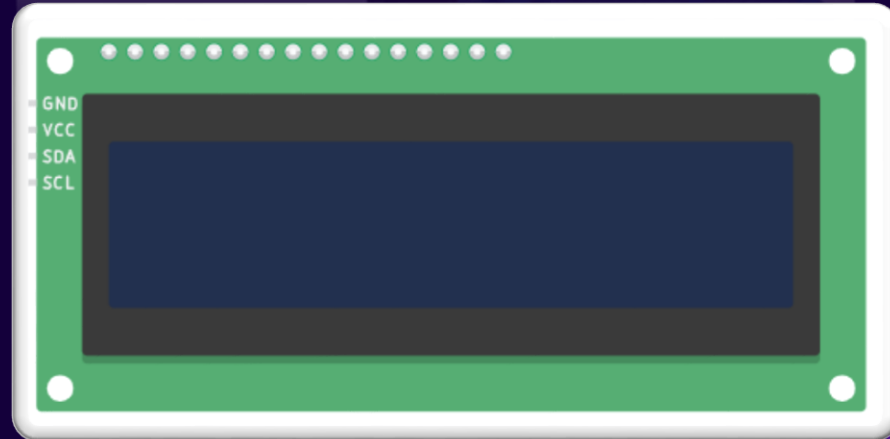

Keypad 4 x 4

Micro Servo

Arduino Uno

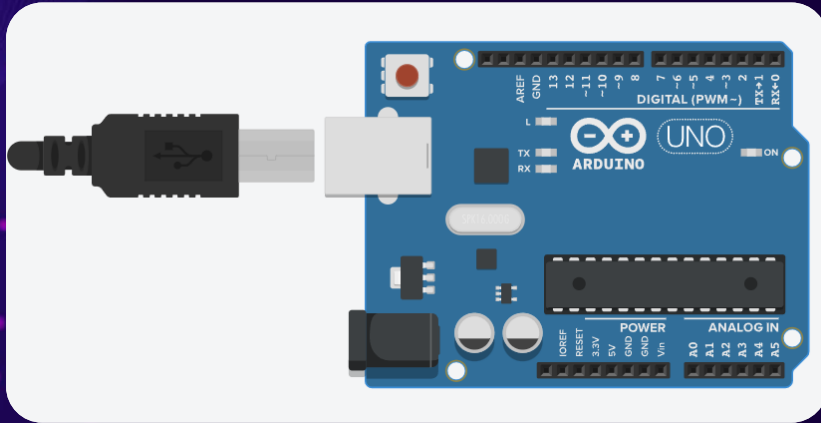

LCD 16 x 2 (I2C)

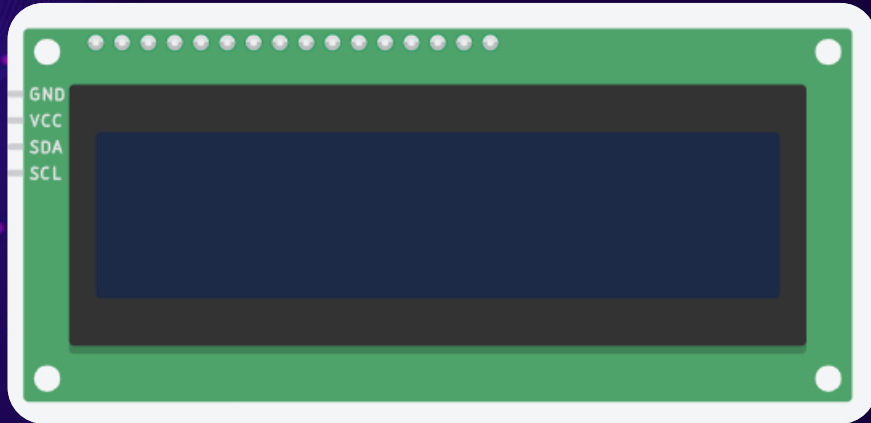

COMPONENT INFORMATION

Arduino Uno

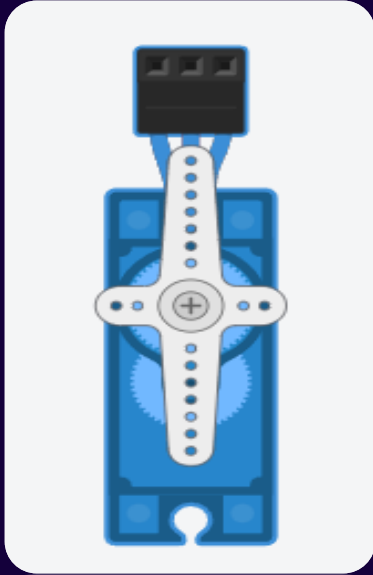

The Arduino Uno is an open-source microcontroller board based on the Microchip ATmega328P microcontroller and developed by Arduino.cc. The board is equipped with sets of digital and analog input/output (I/O) pins

LCD 16×2

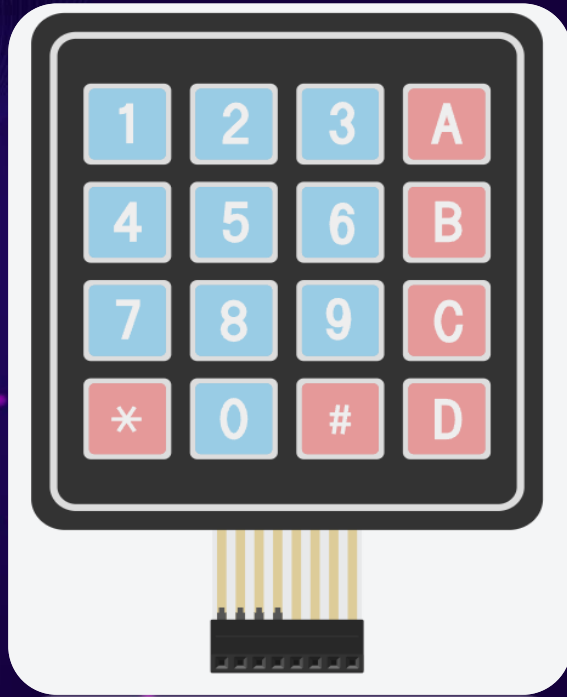

An electronic device that is used to display data and the message is known as **LCD 16×2**. As the name suggests, it includes 16 Columns & 2 Rows so it can display 32 characters ($16 \times 2 = 32$)

Micro Servo

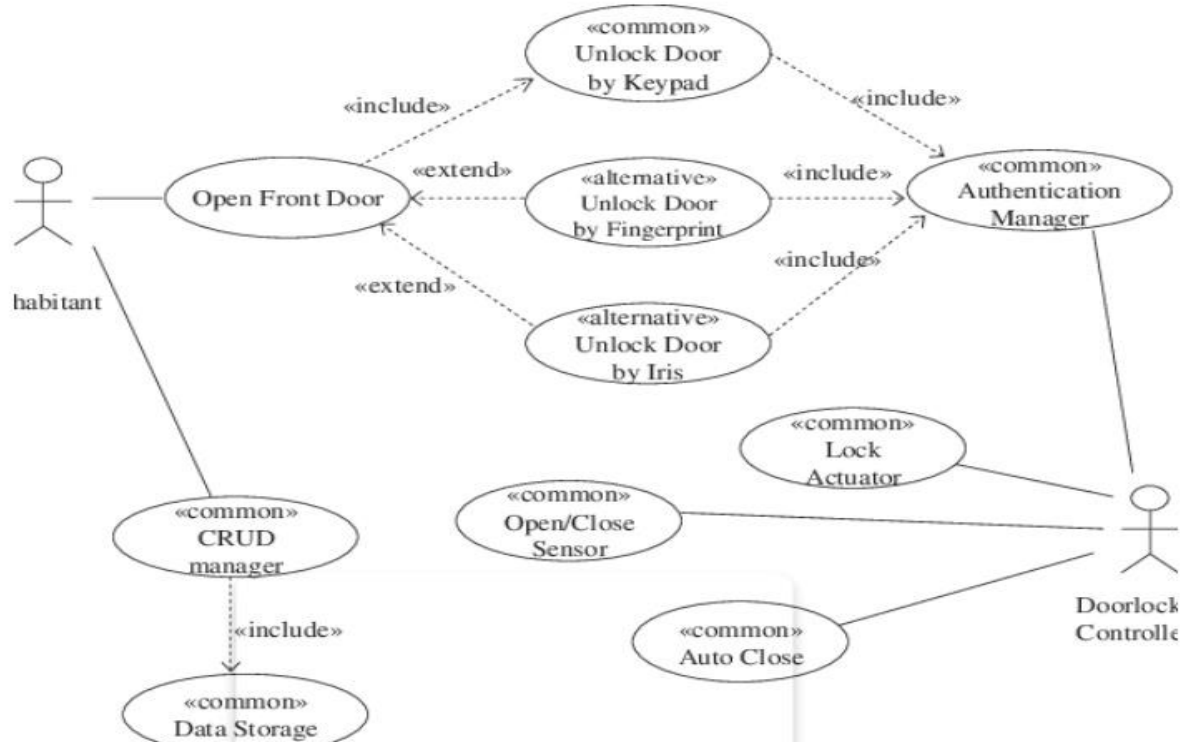

Micro Servo Motor SG90 is a **tiny and lightweight** server motor with **high output power**. Servo can rotate approximately **180** degrees (90 in each direction)

Keypad 4 x 4

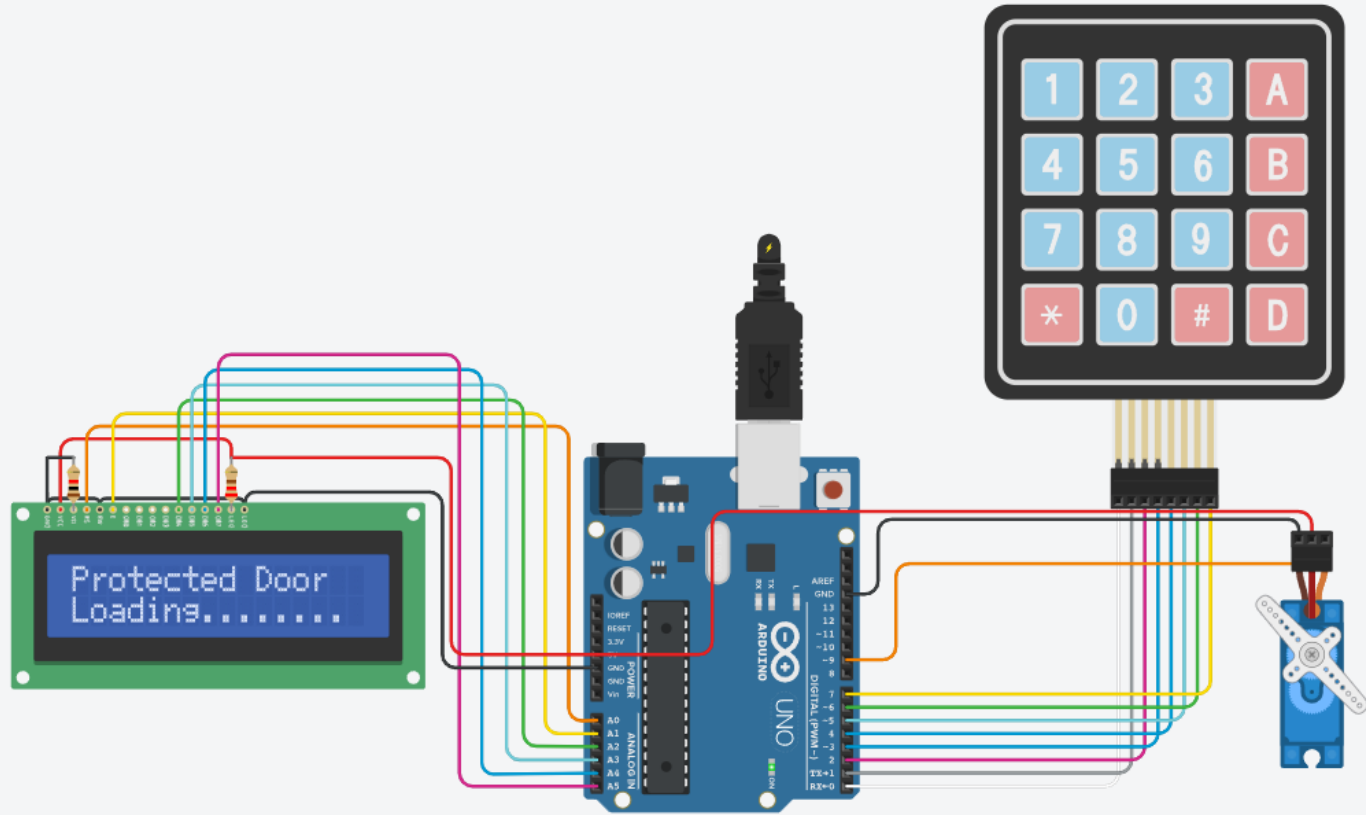

The 4x4 matrix keypad is a simple mechanism that resembles the numeric input on your computer keyboard, except that it has an additional '*', '#' and 4 other auxiliary buttons that can be used for various functions in the application.

USE CASE DIAGRAM

The background features a dark purple gradient with numerous small, glowing purple dots scattered throughout. Overlaid on this are several large, flowing, and translucent shapes composed of many thin, concentric lines. These shapes are primarily purple and blue, with some areas appearing to glow with a bright blue light, creating a sense of depth and movement. The overall aesthetic is futuristic and digital.

CIRCUIT

The background is a deep purple gradient. It features several layers of thin, concentric, wavy lines in shades of purple and blue, creating a sense of depth and movement. Scattered throughout the background are numerous small, glowing dots in various shades of purple and blue, resembling a starry night sky or a digital data field.

141     clearData();
142 }
143 }

```

APPLICATIONS

- Convenient for Elderly and Physically Impaired People
- Ensures You a High Security
- It Detects Your Presence
- Send e Keys to Your Near and Dear Ones
- You simply need a smartphone for that

CONCLUSION

Smart home locks definitely offer some perks like security and convenience, but you also need to understand fully the potential issues it comes with before going ahead and installing them.
